

## Advanced Cylinder Technology

Lock bumping – a surprisingly simple method of breaking in through locked doors and padlocks – is undoubtedly the newest emerging threat to personal property security. And virtually all locks in use today are particularly vulnerable to bumping. Until now.

### THE BUMP STOPS HERE!

As the world leader in security hardware, Master Lock Company has stepped forward to create a revolutionary new lock cylinder that is virtually bump proof and capable of detecting bump attempts.

BumpStop™ Advanced Cylinder Technology employs an innovative, patent pending design which utilizes a unique reverse rake tapered driver pin, high performance springs and tightly machined cylinder chambers. During a bump attempt, this design prevents the transfer of force from the bump key to the pins and therefore blocks rotation of the cylinder so that the lock remains locked.

Rely on Master Lock Company to continue to answer the market's latest security requirements with expert, innovative solutions.

**BumpStop™ stops them time after time.**

# Advanced Cylinder Technology

## Eliminate Security Threats—

Add the BumpStop™ technology to a broad array of American Lock, Master Lock Pro Series® and core laminated locks today!

BumpStop™ MODEL Number Option N	
Example: <b>A700NKA</b>	Example: <b>3NKA</b>
Model Code: <b>A700</b>	Model Code: <b>3</b>
BumpStop™ Option: <b>N</b>	BumpStop™ Option: <b>N</b>
Keyed Alike Option: <b>KA</b>	Keyed Alike Option: <b>KA</b>

**Edge™**  
Key Control

Beyond padlocks, BumpStop™ Advanced Cylinder Technology is available in a broad range of Master Lock NightWatch™ deadbolts and combination deadbolts as well as a variety of Commercial and Residential Door Hardware to provide maximum protection against bumping for all security hardware applications.
